FibroScan®
gateway
by echosens

Optimize clinical workflows with real-time secure data transmission

Save time, secure data, and improve patients follow-up with FibroScan® Gateway. FibroScan® Gateway acts as an integration engine connecting FibroScan® to the EHR (Electronic Health Record) for an automatic upload and storage of the FibroScan® examinations.

Scores
by echosens

Enhancing FibroScan® liver disease assessment with biological markers

FAST™

The optimal point-of-care comprehensive test for the identification of at risk NASH patients

FIBROMETER VCTE™

Cutting-edge liver fibrosis assessment with FibroScan® and biological markers

FIBROMETER™

The benchmark blood test for liver fibrosis diagnosis and disease stratification

Interpretation Guide

Enhanced clinical decision support

The Interpretation Guides utilize data from clinical studies to assist providers in interpreting FibroScan® examination results.

Products in the FibroScan® range are Class IIa medical devices as defined by Directive 93/42/EEC (EC 0459). These devices are designed for use in a medical practice in order to measure liver stiffness and ultrasound attenuation in patients with liver disease. Examinations with FibroScan® device shall be performed by an operator who has been certified by the manufacturer or its approved local representative. Operators are expressly recommended to carefully read the instructions given in the user manual and on the labelling of these products. Check cost defrayal conditions with paying bodies. Products FibroMeter™ FibroMeter VCTE™ and FAST™ are in vitro diagnostic medical devices as defined by Directive 98/79/EC. These scores, based on blood parameters, are useful tools for diagnosing and measuring the extent of liver fibrosis in patients with chronic liver disease of viral (including HIV co-infection), alcohol-related, or metabolic origin. FibroMeter™, FibroMeter VCTE™ FAST™ and FibroScan® are registered trademarks of Echosens. This marketing material is not intended for US audience. – Brochure FibroScan® 630 Expert v10720

FibroScan®
expert 630
by echosens

The complete non-invasive solution for advanced liver disease assessment

FibroScan®
expert 630 by echosens

The complete non-invasive solution for advanced liver disease management

Expand clinical capabilities with spleen stiffness measurement and ultrasound localization system.
Enhance exam efficiency with improved ergonomics and high speed processing.

Powered by

LSM* by VCTE™

Liver Fibrosis

LSM by VCTE™ is unique, patented and validated for liver fibrosis assessment.
- It is the standard for non-invasive evaluation of liver stiffness.[1]
- 2,250 peer-reviewed publications support the use of LSM by VCTE™.

CAP™**

Liver Steatosis

CAP™ is unique, patented and validated for liver steatosis assessment.
- 330 international and peer-reviewed articles support the use of CAP™.[2,3]

SSM* by VCTE™

Portal hypertension

SSM by VCTE™ is unique, patented and validated for portal hypertension assessment and can be used for risk stratification of patients with advanced CLD.[4]
- It is a new marker for non-invasive evaluation of spleen stiffness.
- 50 peer-reviewed publications support the use of SSM by VCTE™

*LSM: Liver Stiffness Measurement / SSM: Spleen Stiffness Measurement.
**Additional cost.

What makes FibroScan® unique?

Fast
A painless exam performed in less than 10 minutes to provide immediate results at the point-of-care.

Intuitive
Can be performed by any trained operator (physician, nurse).

Best in Class
The non-invasive gold standard solution validated by 2,400+ peer-reviewed publications and 60+ international guidelines.

Reliable
Standardized examination with exceptional precision and reproducibility that can be utilized in 99% of patients.[2,3]

Original
Equipped with patented technology and proprietary algorithms to deliver consistently accurate results.

When evidence matters and consistency counts

- **Pioneer** in the field of liver elastography
- FibroScan® produces biomarkers that can assess and monitor patients **over time**
- FibroScan® uses uniform algorithms that minimize **inter-operator variability** and eliminate **inter-system variability**
- **6,500+** FibroScan® installed worldwide enabling millions of liver examinations
- Winner of the Red Dot Design Award (FibroScan® 430 Mini+ model)
